INTRODUCTION

Zenith Pipes Limited is a fully owned and operated Zambian company. We specialize in the manufacturing and installation of HDPE Piping, fittings and associated components. Our highly advanced manufacturing infrastructure includes composite pipes (HDPE with integrated wire mesh) which is a new technology that we are proud to be the first company to bring it to the market in Zambia.

Our capacity of manufacturing covers end to end specifications ranging from 16mm up to 1200mm in diameter and from PN4 up to PN25 in terms of pressure rating.

Zenith workforce includes heavily experienced and fully equipped Projects Managers, and qualified seasoned electrofusion welding crews, as well as a specialized elite team for fabricated and moulded bends. Our Customers benefit from after-market services and technical supports on 24/7 basis.

In 2022, we have been privileged to be the trusted HDPE manufacturer and supplier for the major mining, agriculture, and construction industry leaders in Zambia and DR Congo, where we have executed mega projects in the HDPE sector, ranging from complicated designs, 900mm, PN16 and PN 20 long pipelines, and site installations.

In recent years, we have amassed significant expertise in water systems development and installation as well as piping. This wealth of experience positions us as a reliable and knowledgeable partner in the realm of water development projects, able to handle from manufacturing to complete development and installation.

VISION

Our vision is to become the best and preferred HDPE piping manufacturer and leaders in water systems development and installation in Zambia and in the region, having ability to provide turnkey solutions and services across the full spectrum of the HDPE industry.

OUR CORE VALUES

Excellency - Throughout our value chain and after sale services, we always strive to do our business in an excellent manner.

Integrity - All our business transaction and dealings are professional conducted by our members of staff with utmost integrity.

Product Quality - We give prime importance to the quality of the products manufactured as quality is the basic criterion that manages to give us an edge on the market. We conduct in house standardization based on our laboratory tests in order to safeguard product quality in addition to the adoption of International Standards Organisation (ISO-4427-2007).

Prompt Delivery - Zenith puts customers' needs and expectations first. All our customers, regardless of size or demography are treated with importance.

Support - We endeavour to provide our customers with professional services, advice, after sale services.

Experience - All our staff are highly trained and experienced with a bias towards customer service.

MISSION

Our mission is to provide high quality HDPE piping and associated components with the best industry standard services ranging from installation works, technical, advisory and support to our esteemed clients on 24/7.

REPUTATION

Zenith Pipes Ltd has an enviable reputation for delivering quality prestigious projects on time and within budget far exceeding client's expectations. Our team of professionals work closely with clients ensuring that our clients are always kept apprised of the progress of the work carried out.

OUR OBJECTIVES

- To deliver to our clients the standards of quality specified in the contract within budget.
- To create and maintain a culture of quality within the company.
- To promote strict adherence to quality, health and safety standards.
- To ensure that all consultants, suppliers, subcontractors, and others who are involved in our projects meet the required quality standards.
- To continually review, improve and implement quality control and best practice procedures.

SERVICES

01 Manufacturing

Our manufacturing facility is furnished with modern equipment to ensure compliance to current quality standards.

Whilst we specialise in the manufacture of HDPE pipes for domestic, farming, construction, and mining industries we also offer pre-construction design and estimating, offering cost-effective solutions to meet client's budget forecasts.

02 Consulting

In the realm of consulting, we leverage our deep industry knowledge and technical proficiency to guide clients through various aspects of HDPE applications.

Our consulting service involves collaborating with clients to understand their unique requirements, offering strategic insights, and providing tailored solutions for different projects.

03

Project Management

The project management services we undertake amongst others are:

Project execution planning and processes, Program Management, Design Management and Buildability advice, Scenario Planning, Risk Analysis, Mitigation and Management, Project Team Co-Ordination, Communication and Information Management, Health and Safety Processes, Quality Control and Assurance, Change Control Management, Project Close-out and Handover and Contract Administration.

04

Development and Installation

In the realm of development, the company engages in meticulous planning and project management, ensuring that each step aligns with the client's goals.

Water systems installation is seamlessly woven into this service, encompassing the design and implementation of efficient and reliable water infrastructure such as boreholes and dams.

Additionally, the piping component involves the expertise in selecting and installing high-quality HDPE pipes, optimizing fluid conveyance systems for maximum efficiency and longevity.

At Zenith we highly value the contribution to the **WASH** (**Water, Sanitation and Hygiene**) programs.

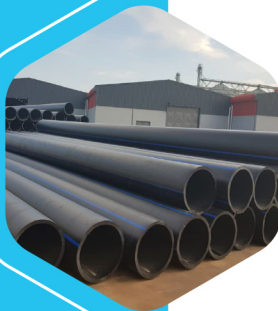

PAST PROJECTS

KARIBA DAM

Supply & Installation

Supplied and installed DN400 HDPE pipes at Kariba Dam as part of the Razorback Construction project.

MULONGA WATER & SEWERAGE CO.

Supply & Installation

Provided supply and installation services for DN630 pipes at Mulonga Water & Sewerage Co.

KANSANSHI TSF1 & TFS2

Manufacturing, Supply & Installation

Executed the production, supply, and installation of a 2097-meter-long DN500 PN16 pipeline with the objective of replacing out-of-service pipes on Tails Line 3 & 4 at TSF1.

Executed the production, supply, and installation of a 6000-meter DN560 PN16 pipeline to replace inactive pipes on Tails Line at TSF2.

LUMWANA

Manufacturing, Supply & Installation

Completed the production, supply, and installation of a 2-kilometer DN225 pipeline

OUR CERTIFICATIONS

EIZ

EIZ Certified

NCC CERTIFICATION

Grade 1, Mining services -
Mechanical Engineering works

NCC CERTIFICATION

Grade 1 - General Civil
Engineering works

ZABS

ZABS Approved products
